your changing
business needs

Web interface
enables you to
change features
at a click
of a mouse

We offer **Hosted Voice** systems. A cloud-based, Voice over IP phone system that delivers best-in-class capabilities at a fraction of the cost of a traditional phone system.

Our pricing includes everything you need – phones, equipment, installation, and training. Advanced features and simple administration via a web portal makes **Hosted Voice Service from VNET** the last phone system you'll ever need.

Velocity Network features the latest IP phones from Polycom and Yealink to power your organization. These phones feature HD Audio, Gigabit Ethernet connectivity, and advanced displays.

Included with the per user handset pricing:

- Bundled price includes unlimited calling in the United States and Canada
- Advanced features such as Auto Attendant, hunt groups, music-on-hold, and Caller ID
- Web Interface to manage your handset settings

There are no hidden costs—you simply pay a flat rate per phone per month and that's it. As your business expands, you can add new users to your account. Have a remote employee? Hosted Voice from VNET allows you to put a phone virtually anywhere with an Internet connection and seamlessly connect it to your main office.

As the region's only locally owned telecommunications carrier, our team is available to support your organization 24x7. Find out how Hosted Voice service from VNET can help your organization do more with your telephone system.
